## X-ray and Clinical Examination

Executed for:  
Master Job

Address:

Executed on:	01/07/2025
Name:	Virgolina Ter Sculem
Chip Number:	967000010244448
UENL Number:	056 002 W00329008
Origin:	Quality Gold Van Het Farasohof x Marius Claudius
Sex:	F
Birthdate:	16/04/2021
Colour:	Brown

## Clinical Examination:

### GENERAL

	good/normal	deviant
Build and Posture:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Feeling Condition:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Skin and Hair:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Mucous membranes:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Lymph Glands:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Eye left:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Eye right:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Mouth:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<a href="#">Circulatory Physiology</a>		
Pulse rate, in condition of rest	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Pulse rate, after labour:	<input checked="" type="checkbox"/>	<input type="checkbox"/>

### [Respiratory System](#)

Spontaneous Cough:	<input checked="" type="checkbox"/> not present	<input type="checkbox"/> present
Additional noises during labour:	<input checked="" type="checkbox"/> no	<input type="checkbox"/> yes
Good/normal deviant larynx:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Condition of incited cough:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Respiration in condition of rest:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Respiration after labour:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Type of respiration:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<a href="#">Digestive Physiology:</a>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<a href="#">Urogenital System:</a>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Nervous System:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Tale Tone:	<input checked="" type="checkbox"/> Min tale tonus, when moving carries her tale	<input type="checkbox"/>
Reflex:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Coordination:	<input checked="" type="checkbox"/> Some tension hindlegs getting out of the stables	<input type="checkbox"/>

### Inspection and Palpation

	good/normal	deviant
Head:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Neck:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Withers:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Back:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Left front leg (LF):	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Right front leg (FR)	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Left hind leg (LH)	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Right hind leg (RH)	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Horn quality:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Hoof percussion:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Hoof visitation:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Size and shape:	<input checked="" type="checkbox"/> equal	<input type="checkbox"/> LF < RF
Scarves present:	<input checked="" type="checkbox"/> no	<input type="checkbox"/> yes, mark: size scarve:

## POSTURE

### Walking on hard surface

	good/normal	deviant
Straight line	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Small circle left:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Small circle right:	<input checked="" type="checkbox"/>	<input type="checkbox"/>

### Trotting on hard surface

Straight line:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Small circle left:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Small circle right:	<input checked="" type="checkbox"/>	<input type="checkbox"/>

### Trotting on soft surface

Small circle left:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Small circle right:	<input checked="" type="checkbox"/>	<input type="checkbox"/>

### Cantering on soft surface

Small circle left:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Small circle right:	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Walking backwards:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Remarks:	none	

## Flexion Tests:

### Tightening of leg

	Not sensitive	Remark
LF:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
RF:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
LH:	<input checked="" type="checkbox"/>	<input type="checkbox"/>
RH:	<input checked="" type="checkbox"/>	<input type="checkbox"/>

### Trotting off after 1 minute bending

LF:	not lame
RF:	not lame
LH:	not lame
RH:	not lame

## Terms and conditions

*A prepurchase or sale examination gives only my personal assessment of the current medical condition of the horse. Linked is a type of risk assessment of medical problems that can happen regarding the use of the horse.*

This examination has several limitations:

- Each exam is a snapshot. Any horse can at one moment seem very healthy, or at another limping, showing heart murmurs or respiratory distress. This difference may be due to coincidence, occurred after injury or illness, changes in housing, whether or even drug camouflage prior to the exam.
- If the customer wants it, there is the possibility to include a blood sampling to detect illegal substances.
- It deals no obligation towards any results. The horse is examined in function of a client and the purpose for which the horse will be used. This exam and the standards used for it, can therefore vary between clients and horses. This report is therefore only applicable to no one else than the person stated on the report.
- The client agrees with the extent of the investigation, and realizes that this is always a compromise between risk-limitation and price for the exam. If for example an additional endoscopy or additional X-rays are desirable, this can be asked in advance or during the exam.
- The standards used in the radiographic examination can be different from those used by colleagues or universities and can differ between what is common in different countries. There are only those findings indicated that I believe are important. Deviations that I believe have no interest are not mentioned. Example: fragments at the distal border of the navicular bone (with or without a recess in the navicular bone itself), ossification of the hoof cartilage, etc.
- Since this exam is no research addressing the capabilities of the horse as a riding or sporthorse... Neither is it a valuation of the horse.
- It cannot clearly demonstrate whether the horse might have had surgery or other treatments, such as repeated infiltration of the joints, colic surgery, ... Hence it is the sole responsibility of the purchaser to cover himself here.
- It is also the sole responsibility of the purchaser to cover himself in terms of stable vices such as: crib biting, wind sucking, weaving ...
- The buyer must be aware that some diseases are seasonal, so they may not be present at the time of the inspection. (for example summer itch, headshaking, ...)
- About this aspect he must cover himself as well.
- If the buyer wants to insure the horse, he will have to wait before buying it, until he has the approval of the insurance company. A test conducted by myself, is not automatically an approval for an insurance company. They may have different standards.
- This exam gives you no advice as a future stallion, because the standards used for this can be vary between the different studbooks.
- It is also the buyer's full responsibility to receive the full ownership papers included the "mutatie luik" of the horse.

This report is only valid if provided with a signature and general terms and conditions.
